Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in July, 2005 and no WBCR was observed. Evidence of human use (footprints, ATV tracks, and fireworks) was observed at three of seven sites observed. The stream met both average and maximum depth criteria in three sites, the maximum depth criterion at a fourth site, and the average depth criterion at a fifth site. No interviews were conducted. Because the stream met the depth criteria, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
